

mede

Interactive Info Gathering Display Kiosk (Indoor)

mede is a slim, elegant free-standing indoor kiosk. Its shape is taken from its sibling the medo which has the same timeless design including to the two sided LED light streaks. The kiosk system is suitable for several applications. There is always space for either a mini pc like the Intel NUC embedded in the unit or a an Android player. The unit can also mount in its body a mini Mac where some integrators prefer to work on only Mac using either Videro CMS software or others. The shape is delicate enough without compromising on stability.

mede is an information gathering kiosk that comes with a 15" screen and options for a barcode reader and an NFC reader for multi-purpose interactive solutions. mede is designed for all public indoor institutions such as hospitals, libraries, schools, government buildings, airports and malls with easy-to-use multi-touch screen. The re-design and customization of mede is possible and can be integrated into any customer project designs.

Two blue LED light streaks run down both sides of the totem can be customized to any LED preferred color. With a Corning Gorilla Glass protective face and rugged structural materials, the medo Interactive Way-Finding Display Kiosks are sturdy and built to last.

Panel parameter

- **Size:** 15 inch
- **Brand:** LG Grade A Commercial LCD
- **Resolution:** up to 1920*1080
- **Brightness:** 350cd/m*2
- **Color:** 16.7M
- **Aspect ratio:** 16:09
- **Response time:** 6.5MS
- **Contrast:** 4000:1
- **View angle:** 178° / 178°(H/V)

Specification

- **Player:** Any mini PC, mini Mac or Android OPS
- **I/O Connectors:** 1 x USB HOST, 1 x USB OTG, 3G module (A PCIE slot, A USB interface), 1 x LVDS Interface, 1 x Audio input, 1 x Audio output, video input (VGA×1, HDMI×1)
